PROFILE

I'm a Copenhagen based full-stack web developer. Always trying to stay tuned with the new techs within the industry, and in constant pursuit of challenges. I'm a team player, good at solving problems to everyone's satisfaction, always motivated, adaptable, and work well under pressure.

EDUCATION

HackYourFuture, Copenhagen

September 2019- July 2020

During the course at HYF I learned a modern JavaScript full-stack as well as working together and collaborating with a team on the same project, solving the problems we faced, communicating with all other students and mentors, debugging process, and testing the code we write.

Al Maamoun, Aleppo — *High-school*

September 2000 - July 2003
Mathematical High school

EXPERIENCE

DHL, Copenhagen — *Courier*

May 2017 - April 2020

Since I came to Denmark I needed a job so I can pay my bills and get more understanding about the market and the culture in Denmark, at the same time focusing and keep learning new things especially in the IT field.

Al Dahabi, Aleppo — *CEO*

November 2006 - August 2014

Start-up a wholesale company in Aleppo, Syria. The business consisted of imports of mobile accessories from China. Through a previous job, I became aware of a customer need.
